## Australians love a Kelvinator

For over 90 years, Kelvinator has been delivering reliability and performance to Australian families. It's a brand you can trust to get the job done well and it's easy to see why. There's peace of mind in knowing that with Kelvinator, you will be comfortable for years to come.

Designed for simplicity, longevity and superior performance, you can simply sit back and enjoy the benefits.

# Air conditioning features

## Brand

All Kelvinator products go through rigorous testing to ensure they meet stringent Australian performance and quality standards.

## Control from the comfort of your armchair

All models come with a remote control that lets you conveniently control all functions. Depending on which model you choose, other great features include auto air swing left-right to give a natural feel to air movement, auto restart, climate control, timer, sleep mode and a 3-speed fan for lower energy consumption and greater comfort.

(Excluding model KWH16CMF).

## Simple, economic and reliable

Because there are no separate indoor and outdoor units, it's easier to install a window wall model. And because it's a Kelvinator, you know it is reliable and built to last.

## Compact

The super compact design means that window wall air conditioners are discreet and unobtrusive in your home. They are also perfect for cooling smaller family homes and space-restricted areas.

## Fresh air delivery

The fresh air return provides additional ventilation to your room and can also assist in humidity control. The easy-to-service dust filter removes dust and other larger airborne particles for cleaner air.

# Choosing the right air conditioner

It's important to select the right sized air conditioner for your room in order to ensure effective and efficient cooling and heating.

1. Total size of room (m<sup>2</sup>)?

3. Do you have ceiling insulation?

2. Direction the main window faces?

4. Do you require an air conditioner that heats and cools or cools only?
